

MaxDRP™ Plus ripper point

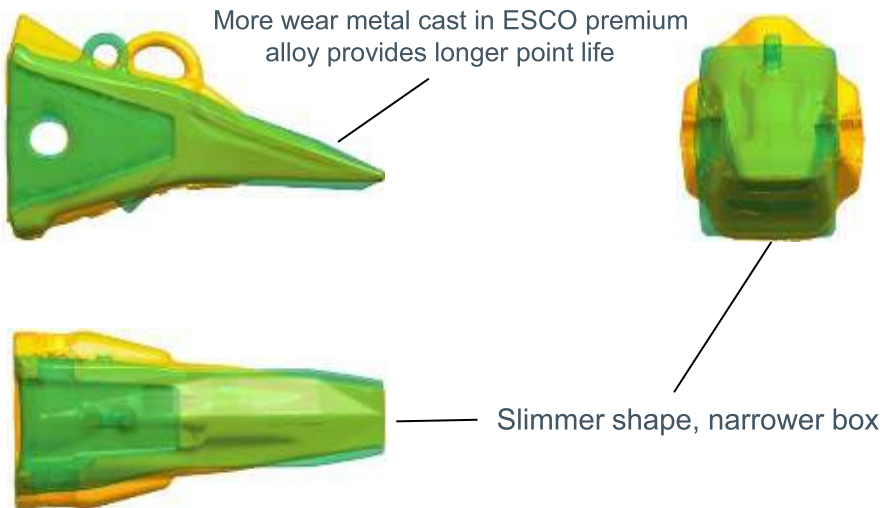

**Developed for site safety and ease of use**

The system utilizes a standard wrench on a unique pin and collar locking system eliminating the need for using a hammer. No modifications to the ripper shank or nose are required to use this new system. In addition, ESCO alloy point shapes provide up to 25% longer wear life for reduced maintenance cost.

**Key benefits**

- Easy installation and removal
- Reusable pin and collars saves money
- Slimmer profile, longer wear life
- No change to shank required

**ESCO PR500 point (green) vs OEM point (yellow)**
