1

POSTURE RITE™ HEADREST

Every back is different. With high back cushions, help to prevent damage from bad posture, keeping you feeling relaxed, even during long periods behind the controls. The Posture Rite™ headrest can be adjusted with 4 forward positions.

2

FABRIC DESIGN

Tough, hard wearing, waterproof, stylish and good looking.

3

FULLY ADJUSTABLE ARMREST (Optional)

Designed for easy angle adjustment on the move, these fully fold up arms feature substantial foam padding on the inside of the arm greatly improving comfort over rough terrain, plus height adjustment of 40 mm.

4

WIDE DOUBLE DEPTH CUSHIONS

For superior support and comfort the patented Fabriform cushions - developed in Europe and on the prairies of North America - are ergonomically designed using double depth foam, making Sears cushion comfort legendary.

5

SEAT CUSHION EXTENSION

60 mm (2 1/4 ") in 5 steps providing thigh support whatever your height

6

DuraPuck™ Slides

The unique patented DuraPuck™ slide (as used by CATERPILLER) with 180mm (7") of travel. Non jamming, adjustable with 10,000 hour reliability. The ultimate slide available today.

THE NEW 89 SERIES TOGGLELINK™ (TLV™)

Low natural frequency Airide® suspension

The unique and very robust TLV™ or Toggle Link™ Suspension replaces traditional roller bearings with toggle links, virtually eliminating side play whilst vastly improving durability. TLV technology was first introduced in 1999 - this all NEW unique suspension design features cast toggles scissors and cab floor mounting points.

- Automatic height & weight adjustment 50 -175kg
- 80mm (3") seat height adjustment
Perfect positioning for any height
- 80mm (3") suspension travel Isolates even the hardest vertical jolts

7

**Low
Frequency
Suspension**

8

ERGONOMICAL SCULPTURED BACKREST

For full range of movement

9

DOCUMENT HOLDER *(Optional)*

10

SEAT HEATING *(Optional)*

Thermostatically controlled heater with multi filament design for rapid warm up.

CUSHION VENTILATION SYSTEM

Multi fan, 3 position cushion ventilation system for a superior cooling effect while working.

11

ELECTRIC AIR LUMBAR SUPPORT

Back care at the touch of a button. The air lumbar support molds itself to your back, quickly and exactly - not only making you feel comfortable, but also preventing damage to your spine by ergonomically supporting your lower back.

LATERAL ISOLATOR *(Optional)*

The heavy duty DUO® damped lateral isolator system with nylon rollers, provides vastly improved ride performance when the going gets tough, reducing side-to-side vibration and jarring especially at high speeds.

HORIZONTAL ISOLATOR *(Optional)*

Fully sprung and DUO® damped with 50mm of travel, this lockable feature offers the greatest protection from fore-aft jolts and vibration created when traveling at high speeds, over tough terrain or when using trailers or auxiliary equipment.

12

INFINITE SEAT BACK ANGLE ADJUSTMENT

13

SEAT CUSHION ANGLE ADJUSTMENT (21")

The adjustable Seat Angle reduces pressure on the back of the knees in 3 steps.

14

ADJUSTABLE DUO® DAMPER AND FIXED DUO®

The unique twin chambered Duo dampers offer vastly improved performance, especially over extended work cycles. The wide damper body provides heat dissipation, while the second damper chamber provides fluid cooling, helping to optimize performance. It also provides not just hard and soft settings but a fully multi-position damper to suit virtually all jobs and terrain conditions. By utilising two dampers, almost all ride conditions and driver requirements can be dealt with. This has to be the ULTIMATE damping solution.

THE **ULTIMATE** MINING SEATS

The **ULTIMATE** range of seats for mining equipment offers the ultimate comfort, durability and ride. Fitted with patented TOGGLE LINK low frequency Airide suspension and patented Durapuck slides, which are industry proven, as factory fitted by Caterpillar.
